

Vintage Swallow

Just prior to WW II this plane was being folded in England. Showed up in USA during WW II (as best I can find). I can track it in Japan at least just at the end of the war based on information from my only Japanese contact who was making them at that time. With its origami folds and bird like appearance where is it's origin? Any information let me know. Americans soon changed nose to match nose shown in my Classic Acro which flies just as well but lose the bird look.

Note: Red lines are for folds, blue lines indicate existing creases, and green lines represent hidden edges.

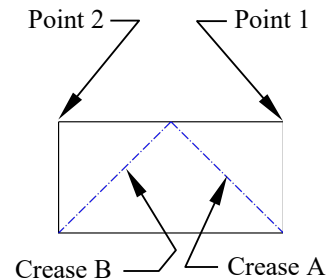

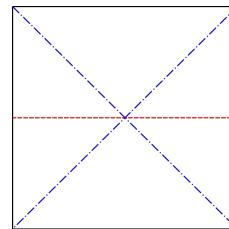

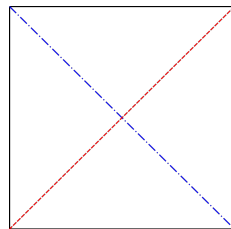

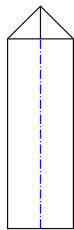

Step 1
Fold top right corner down as shown.

Step 2
Fold and tear or cut at Line A to separate Sections A and B.

Step 3
Fold Section A in half as shown. Crease and unfold.

Step 4
Fold top corners to centerline as shown.

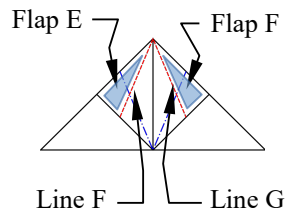

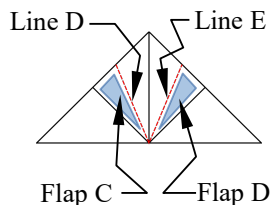

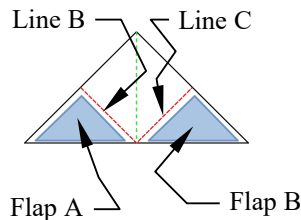

Step 5
Set completed Section A aside.

Step 6
Unfold Section B and fold left top corner down as shown. Crease and unfold.

Step 7
Fold plane in half as shown.

Step 8
Reverse fold Points 1 and 2 inside along Creases A and B.

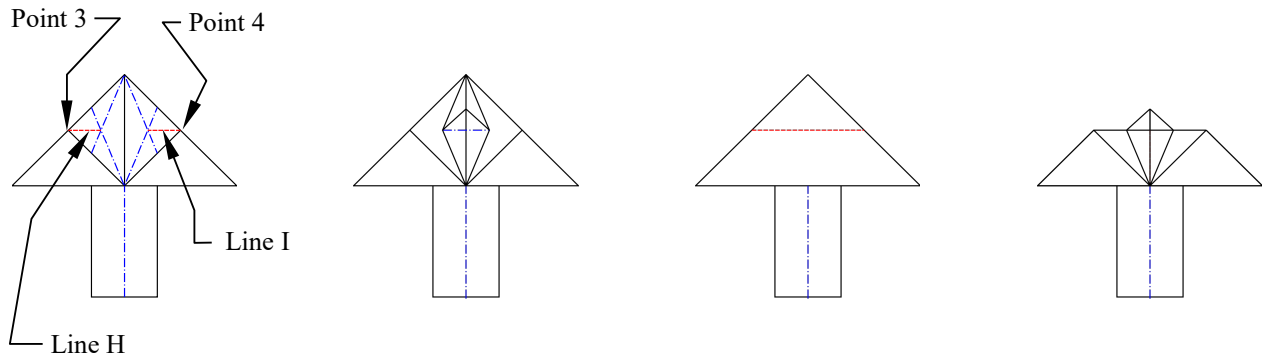

Step 9
Fold Flaps A and B along Lines B and C as shown. Flatten well.

Step 10
Fold Flaps C and D along Lines D and E as shown. Crease and unfold.

Step 11
Fold Flaps E and F along Lines F and G as shown. Crease and unfold.

Paper Airplane Flying Instructions

Throw level at a "medium" or "slow" speed. [Trim per general instructions](#) if required but the plane seems to do well "as folded" on a variety of [paper](#).

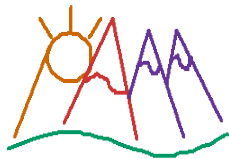

Step 12
 Pinch Points 3 and 4 along Lines H and I as shown. Fold formed nose up. Flatten well.

Step 13
 Flip plane over as shown.

Step 14
 Fold top point down as shown.

Step 15
 Fold along centerline approximately to this shape:
