

Hand Toss 11

Instructions:

1. Cut out and lay pieces as shown. Starting with center (CB0) use a glue stick to glue body section together (LB1&2, RB1&2).
2. After Body dries glue nose pieces on (LN2-4, RN2-4). Glue tail stiffener on to keep horizontal tail halves level and square.
3. Using a can or other cylindrical item add some initial curve to the wing halves by rubbing flat wing along the curve of the can. Flatten wing tabs with pencil or similar item and glue wing in place. This style is referred to as a forward swept wing.
4. Before Body/Wing assembly completely dries use gauge to set dihedral angle for wings as shown:

Note: Quick instructions only see full instructions here.
